DETAILED ACTION

Allowable Subject Matter

Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance: prior art references do not teach or render obvious a semiconductor device with improved electrostatic discharge tolerance comprising a well stripe of the second conductive type on the semiconductor substrate, extending in a first direction at an angle to a channel width direction of at least one of the channel regions; and a doped segment of the first conductive type in the well stripe, coupled to the pad.

Prior art references do not teach or render obvious a pad cell of a semiconductor integrated circuit comprising a conductor segment positioned between the pad and the transistor for coupling the pad and the transistor; a well region of the second conductive type formed in the substrate and spaced apart from the transistor; and a first doped region disposed in the well region; wherein the well region is positioned substantially under the conductor segment; and the first doped region is coupled to the conductor segment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
